Claims Allowed

1. Claims 1,4,8,11-12,14-16,18-19,21-24,34-36,38-41,44-49,51,55,57,60,63-67,70,74,77-78,80,83,90,93,95-96 and 100(renumbered as 1-47), are allowed.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: the closest prior art of Chao et al. (US 6,529,614) provides for spatially modulated light source responsive to said input, for presenting said input as a spaced apart discrete input set with dead space between all input set elements (Fig.2 element 206, col.4 lines 60-65) at least one continuous Fourier transform optical component (Fig.2 step 256 see Fourier lens). The prior art of Chao either alone or in-combination failed to teach or suggest for **windowing spatially discrete regions in the transform space with a second window function that is related to the first window function by a matching condition so that at least one of intensities and phases of transformed light in the transform space regions are proportional to coefficients of a discrete transform of the input set.** As cited in independent claim1. Reasons for allowance for independent claims 39 and 90 was mailed on 12/09/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
